

# Conflagration in Communities; Full Scale Experiments and Field Investigations

**Faraz Hedayati**

***Lead Research Engineer***

Insurance Institute for Business & Home Safety

Table 2. Contributing Factors

Natural Environment	The Built Environment	Humans
Topography	Structure density	Preparedness and mitigation
Climatology	Building materials	Ignition sources
Local Weather	Connective fuels	Fire service intervention
Wildland Fuels	Infrastructure	

# THE RETURN OF CONFLAGRATION IN OUR BUILT ENVIRONMENT

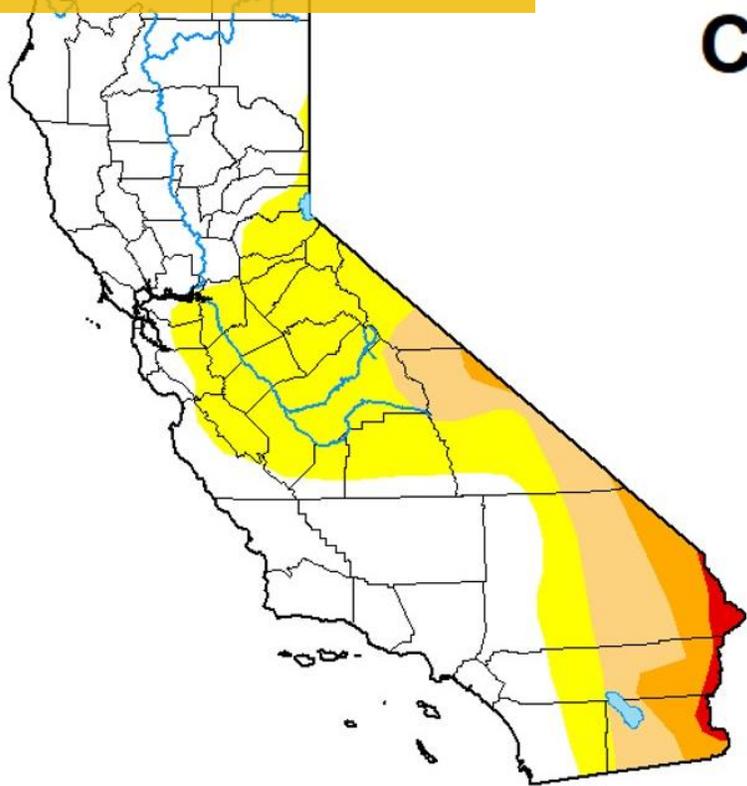

IBHS WILDFIRE RESEARCH REPORT  
September 2023

Ian M. Giammanco, PhD  
Faraz Hedayati, PhD  
Steve R. Hawks  
Xareni Sanchez Monroy, PhD  
Evan Sluder

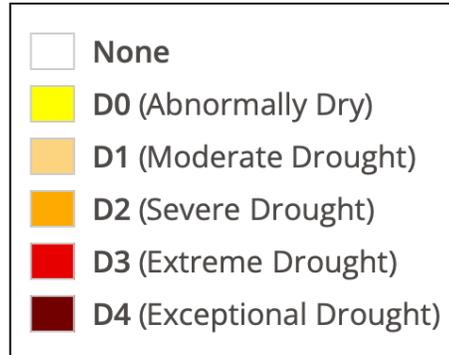

# DROUGHT

## U.S. Drought Monitor California

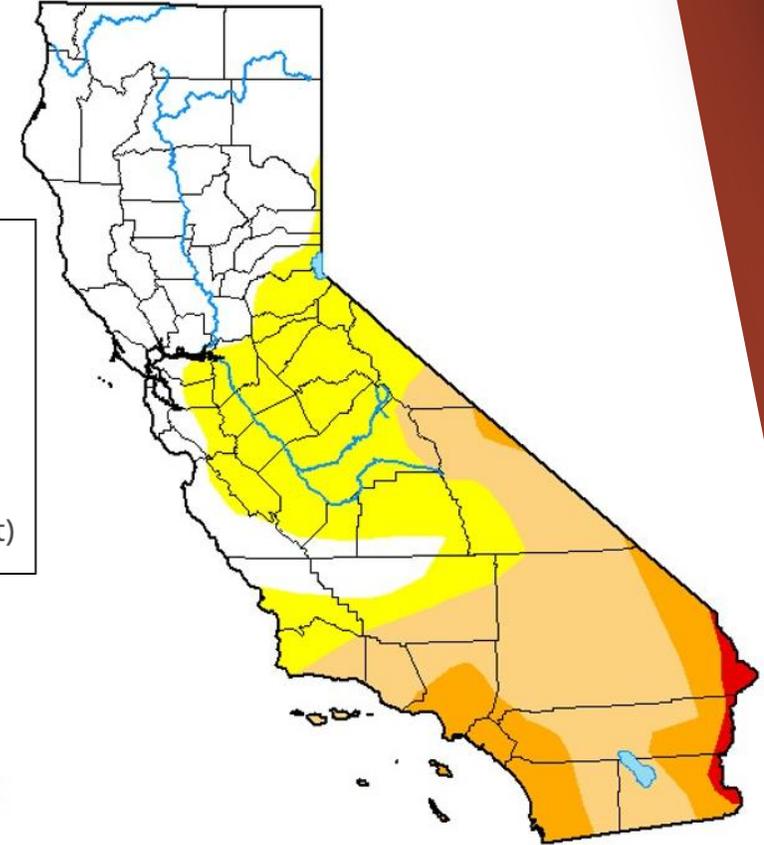

**December 3, 2024**  
(Released Thursday, Dec. 5, 2024)  
Valid 7 a.m. EST

*Author:*  
David Simeral  
Western Regional Climate Center

[droughtmonitor.unl.edu](http://droughtmonitor.unl.edu)

**January 7, 2025**  
(Released Thursday, Jan. 9, 2025)  
Valid 7 a.m. EST

By January 7, 2025, more than  
**5.8 million people**  
were living in areas classified as  
severe drought in LA County.

# DOWNSLOPING WIND

COURTESY OF CAL FIRE

EATON FIRE

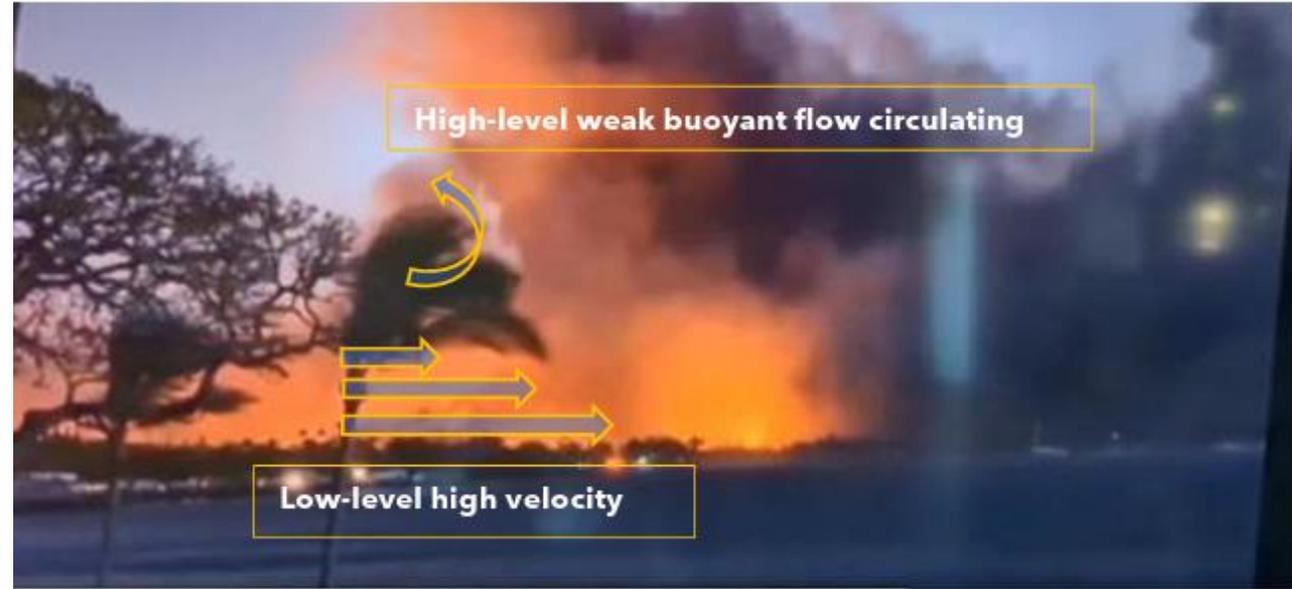

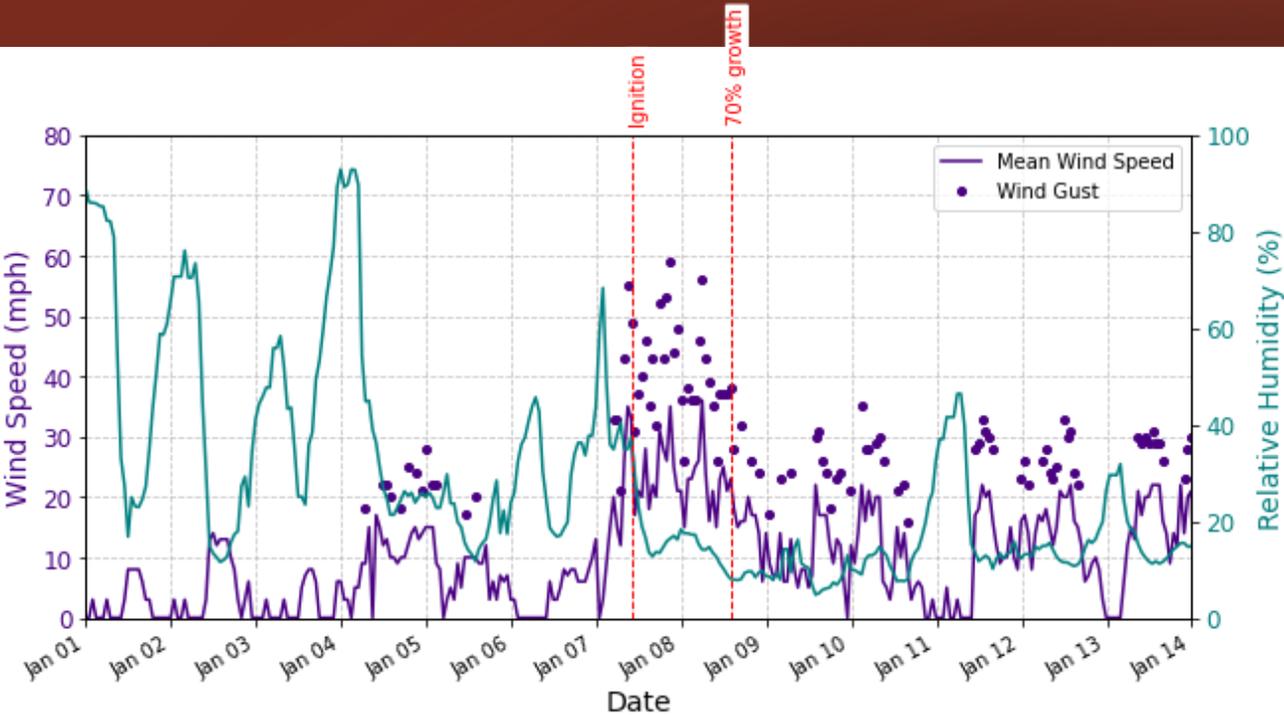

Figure 39. Frame from a publicly available video of the Lahaina Fire shows the impact of downsloping winds with annotations describing the wind flow added (Lareau, 2023).

LAHAINA FIRE

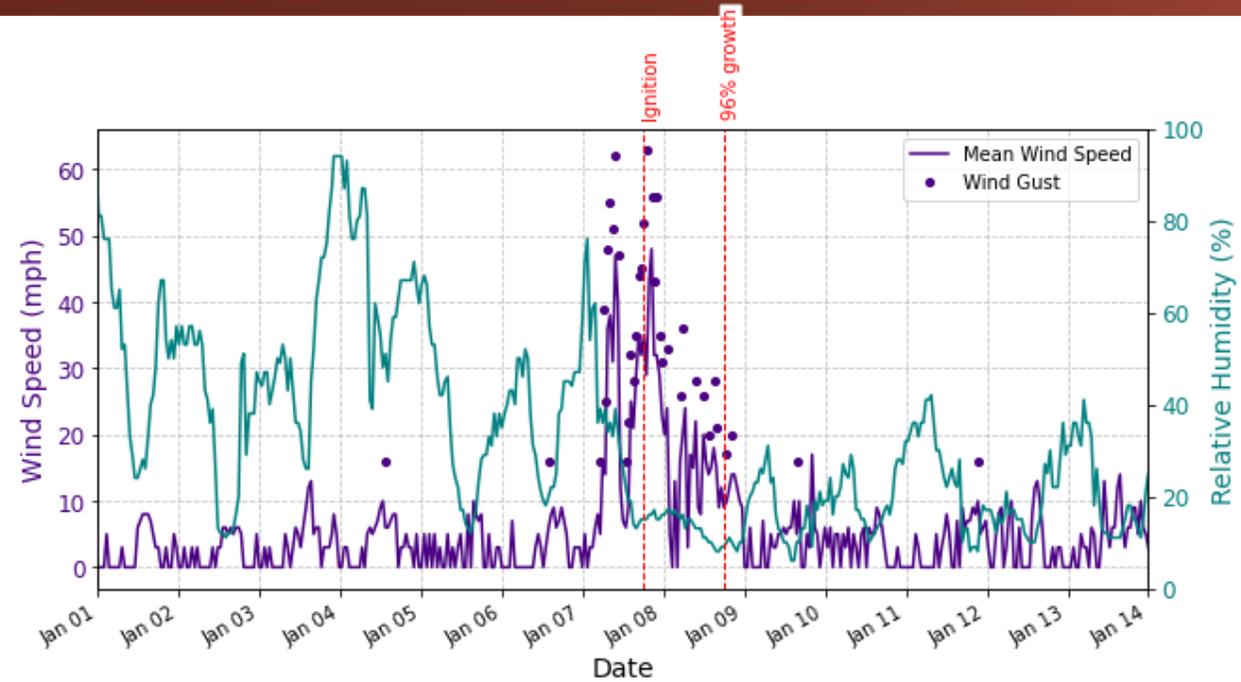

# WIND

14 hours

*PALISADES*  
Peak Gust: 75 mph

24 hours

*EATON*  
Peak Gust: 65 mph
